ComplyTrack™ Professional Services

The ever-increasing regulatory burden placed on healthcare organizations translates to an ever-increasing workload for all impacted employees, including compliance, risk, information security, privacy, safety, legal, human resources, and safety and quality professionals.

- **Know you're getting the most from your investment** as our *ComplyTrack™* Professional Services Team oversees all aspects of product implementation, offering multiple levels of service, to ensure that you achieve your goals and realize maximum return on your investment by utilizing the full potential of the *ComplyTrack™* solution.
- **Make the right decisions at the right time** by deriving maximum value from your compliance and risk management processes.
- **Get the information you need, when you need it**, by taking full advantage of our Services Team, which stands ready to meet the needs you may have relating to data conversion, system design and configuration, and report development.

We offer a wide array of *ComplyTrack™* Professional Services to help you derive maximum value from your tools, your data, and your existing team. Call 800.808.6800 or visit complytrack.com for more information.

Organization of all sizes rely on us for help with:

Implementation Services

We work with your team to configure and deploy the *ComplyTrack™* solution into your organization. We deliver a customized implementation plan to ensure the project is within scope, on time, and that you achieve optimal use and performance across your organization, whether you are deploying a single workflow or the entire *ComplyTrack™* solution. Multiple levels of implementation services allow you to choose the package that best fits your organization's unique needs.

Training Services

Each *ComplyTrack™* implementation comes with online and phone support and training included, so you can realize maximum return on your investment by utilizing the full potential of the *ComplyTrack™* solution. Beyond the included product training, our Best Practices Workshop provides personalized deployment and training services for customers looking to optimize an existing module or to support a newly defined business process. For more focused, extensive and/or intensive training, our On-Site Best Practices Workshop is ideal for those requiring more customized learning through direct interaction with a *ComplyTrack™* product expert.

Deployment Services

Get customized support for the initial setup and configuration of *ComplyTrack™* or optimize your utilization with personalized deployment services for an existing module or to support a newly-defined business process. We work with your team to understand your unique environment and provide guidance on the current best practices for configuring, managing, and utilizing *ComplyTrack*. If you have data that resides in multiple spreadsheets, internal databases, legacy software systems, or some combination of the three, our technical team will work with yours to streamline and automate the import of your legacy data into *ComplyTrack*.
